Chairs Welcome

Welcome to the Smart Digital Futures 2023 (SDF-23) multi-theme conference held at the Aran Mantegna Hotel in Rome, Italy during 14-16 June 2023.

SDF-23 is an amalgamation of six KES conferences: Agent and Multi-Agent Systems - Technology and Applications (KES-AMSTA-23), Intelligent Decision Technologies (KES-IDT-23), Human Centred Intelligent Systems (KES-HCIS-23), Innovation in Medicine and Healthcare (KES-InMed-23), Smart Education and e-Learning (KES-SEEL-23) and Smart Transportation Systems (KES-STS-23). Although the conferences share a common forum, each one has its own Chair and International Programme Committee.

SDF-23 was intended to be, as far as possible, a conference with physical attendance of delegates. However, to allow for those unable to travel to the conference location, provision was made for an element of virtual attendance. In either case delegates could submit a paper and present it to conference delegates.

The best papers submitted to the conference were presented and published in several volumes of proceedings in the Smart Innovation Systems and Technology series by Springer-Verlag.

Smart Digital Futures was organised as part of the KES International conference portfolio. For over a decade the mission of KES International has been to provide a professional community, networking and publication opportunities for all those who work in knowledge-intensive subjects. At KES we are passionate about the dissemination, transfer, sharing and brokerage of knowledge. The KES community consists of several thousand experts, scientists, academics, engineers, students and practitioners who participate in KES activities. KES runs conferences in different countries of the world on leading edge topics including Intelligent Systems, Sustainability in Energy and Buildings, Innovation, Knowledge Transfer and Enterprise, and Digital Media. KES provides routes to publication, such as journals, book series, and online publications, both through its own media and in conjunction with major publishers. KES also provides knowledge transfer services and consultancy.

The aim of Smart Digital Futures was to bring together researchers working at the leading edge of developments in smart systems and intelligent technology theory and applications. This programme contains 163 papers, each selected after full peer review by members of the International Programme Committees of the conferences.

We thank the keynote speakers for providing informative accounts of the latest research in their areas:

- Prof. Yen-Wei Chen, Ritsumeikan University, Japan (title of talk: 'Semi-supervised Deep Learning in Medical Imaging')
- Prof. Gennaro Cordasco, University of Campania "Luigi Vanvitelli", Italy (title of talk: 'Detecting individuals' emotional states and personality traits through the machine learning processing of non-invasive online handwriting and drawing samples')
- Prof. Andrzej Czyżewski, Gdańsk University of Technology, Poland (title of talk: 'Multimedia industrial and medical applications supported by machine learning')
- Prof. Bożena Kostek, Gdańsk University of Technology, Poland (title of talk: 'Data, Information, Knowledge, Wisdom Pyramid concept revisited in the context of deep learning')
- Prof. Karlheinz Blank, Reutlingen University, Germany (title of talk: 'From Data to Value! AI as a building block of a smart digital future!')

We thank the General Chairs and Programme Chairs of the SDF-23 conferences for their hard work and dedication. We appreciate the efforts of those organising and chairing special sessions, members of the International Programme Committees and reviewers and we thank them. We are grateful to authors for the papers they have contributed to the conference, and to delegates for their attendance and we give them our thanks.

Finally, we thank the KES International administration team for their efforts.

We hope you find the conference useful and informative, we wish you all well, and we look forward to seeing you at another of our events in the future.

Semi-supervised Deep Learning in Medical Imaging

Abstract: Recently, deep learning (DL) plays important roles in many academic and industrial areas especially in computer vision and image recognition. Deep learning uses a neural network with deep structure to build a high-level feature space. It learns data-driven, highly representative, hierarchical image features, which have proven to be superior to conventional hand-crafted low-level features and mid-level features. In ILSVRC2015 (an Annual competition of image classification at large scale), higher recognition accuracy by deep learning than human has been achieved. Deep learning (DL) has also been applied to medical image analysis. Compared with DL-based natural image analysis, there are several challenges in DL-based medical image analysis due to their high dimensionality and limited number of labeled training samples. We proposed several semi-supervised deep learning techniques for computer-aided diagnosis and surgery support including medical image segmentation, medical image detection and medical image recognition. In this talk, I will talk about current progress and futures of computer-aided diagnosis and surgery support with deep learning.

Biography: Yen-Wei Chen received the B.E. degree in 1985 from Kobe Univ., Kobe, Japan, the M.E. degree in 1987, and the D.E. degree in 1990, both from Osaka Univ., Osaka, Japan. He was a research fellow with the Institute for Laser Technology, Osaka, from 1991 to 1994. From Oct. 1994 to Mar. 2004, he was an associate Professor and a professor with the Department of Electrical and Electronic Engineering, Univ. of the Ryukyus, Okinawa, Japan. He is currently a professor with the college of

Information Science and Engineering, Ritsumeikan University, Japan. He is the founder and the first director of Center of Advanced ICT for Medicine and Healthcare, Ritsumeikan University.

His research interests include medical image analysis, computer vision and computational intelligence. He has published more than 300 research papers in a number of leading journals and leading conferences including IEEE Trans. Image Processing, IEEE Trans. Medical Imaging, Pattern Recognition. He has received many distinguished awards including ICPR2012 Best Scientific Paper Award, 2014 JAMIT Best Paper Award. He is/was a leader of numerous national and industrial research projects.

Detecting individuals' emotional states and personality traits through the machine learning processing of non-invasive online handwriting and drawing samples

Abstract: The importance of detecting early signs of illnesses can be extended to the detection of negative emotions as well as personality traits since emotions such as depression, anxiety, and stress, as well as personality traits, influence individuals' health and behaviors. We present an innovative approach to detect negative emotions (such as depression, anxiety, and stress), cognitive impairments and personality traits, through handwriting and drawing features. Our approach is non invasive and consists in collecting individual's handwriting/drawing samples through a computerized platform and predict individuals' emotional states and personality traits through machine-learning approaches.

Biography: Gennaro Cordasco received a PhD degree in Computer Science from Salerno University (IT). Gennaro has been Research-Scholar at the Theoretical Aspect of Parallel and Distributed Systems TAPADS) Lab, University of Massachusetts at Amherst MA, USA (Mar-Nov 2005), doing research activity under the supervision of the Distinguished Professor A.L. Rosenberg.

From 2006 to 2011, he has been Post-Doc at Salerno University, doing research activity at the ISISLab laboratory.

From 2011 to 2020, he has been Assistant Professor at the Dipartimento di Psicologia, University della Campania "L. Vanvitelli" (IT).

Gennaro is currently an Associate Professor in Computer Science at the Dipartimento di Psicologia, University della Campania "L. Vanvitelli" and an affiliate of the International Institute for Advanced Scientific Studies, Italy. His research interests focus on Information diffusion in Networks, Agent-based simulations and optimizations, Handwriting analysis and Emotion recognition.

Multimedia industrial and medical applications supported by machine learning

Abstract: This article outlines a keynote paper presented at the Intelligent Decision Technologies conference providing a part of the KES Multi-theme Conference "Smart Digital Futures" organized in Rome on June 14-16, 2023. It briefly discusses projects related to traffic control using developed intelligent traffic signs and diagnosing the health of wind turbine mechanisms and multimodal biometric authentication for banking branches to provide selected examples of industrial applications of intelligent decision technologies. In addition, the developed medical applications for communicating with the surroundings by unconscious people, advanced analyzing disordered speech, and an advanced non-contact respiratory-circulatory radar are presented, using intelligent data analysis and machine learning.

Biography: Prof. Andrzej Czyżewski has headed the Multimedia Systems Department at Gdańsk University of Technology for more than 30 years. He is the author of more than 600 publications that have appeared in print in scientific journals and conference proceedings, as well as three books and 30 patents, and co-author of more than a dozen solutions implemented in production.

His research interests revolve around issues related to data engineering, signal processing, machine learning, and their numerous interdisciplinary applications. Under the leadership of prof. Andrzej Czyzewski at Gdańsk University of Technology, more than 40 research projects have been carried out to date, including seven international projects.

Data, Information, Knowledge, Wisdom Pyramid concept revisited in the context of deep learning

Abstract: In this presentation, the data, information, knowledge, and wisdom (DIKW) pyramid is revisited in the context of deep learning applied to machine learning-based audio signal processing. A discussion on the DIKW schema is carried out, resulting in a proposal that may supplement the original concept. Parallels between DIKW pertaining to audio processing are presented based on examples of the case studies performed by the author and her collaborators. The studies shown refer to the challenge concerning the notion that classification performed by machine learning (ML) is/or should be better than human-based expertise. Conclusions are also presented.

Biography: BOZENA KOSTEK is a professor and head of the Audio and Acoustics Laboratory at Gdansk University of Technology (GUT), Poland. She is a corresponding member of the Polish Academy of Sciences, a Fellow of the Acoustical Society of America, and the Audio Engineering Society. Her research activities are interdisciplinary; however, the main research interests focus on cognitive bases of hearing and vision, intelligent signal processing, music information retrieval, musical informatics, Quality-of-Experience, human-computer-

interaction (HCI), as well as applications of machine learning and computational intelligence to the mentioned domains. She published more than 600 scientific papers in journals and at conferences. She also authored or coauthored some technological solutions (40). She led a number of research projects sponsored by the Polish Ministry of Science and Education, the Polish National Centre for R&D, and the National Science Centre, as well as participated in EU projects. Prof. Bożena Kostek has been a guest speaker, session, and panel organizer at conferences held in many countries worldwide. Prof. Kostek acted as Editor-In-Chief for the Journal of the Audio Engineering Society (JAES) and the Archives of Acoustics. In 2013 she served as Associate Editor of the IEEE Transactions on Audio, Speech and Language. Under her guidance, 20 Ph.D. students supported their doctoral theses and 320 M.Sc. and Eng. works. She is the recipient of many prestigious awards, including two 1st prizes from the Prime Minister of Poland, several prizes from the Minister of Science, an award from the Polish Academy of Sciences, and a Distinguished Service Medal Award from the Audio Engineering Society.

Prof. Karlheinz Blank

Reutlingen University, Germany

From Data to Value! AI as a building block of a smart digital future!

Abstract: In his talk, Karlheinz Blank focuses on how to utilize good ideas to bring benefits to small businesses, rather than examining big innovations by tech leaders like Steve Jobs or Elon Musk. He emphasizes the importance of analyzing data, monitoring quality and production to enhance efficiency in a plant. The goal is to generate greater value through more efficient use of resources. He invites entrepreneurs, production managers, technical experts and users to join workshops, where he offers ways for each participant to incorporate AI into their business in small, manageable steps. Karlheinz Blank believes that many small steps will lead to a smarter, digital future.

Biography: Karlheinz Blank is an Honorary Professor at Reutlingen University's Computer Science Faculty and at the Herman Hollerith Zentrum. He has been teaching Artificial Intelligence, Project Management, Business Computing, and Enterprise Architecture Management for over 20 years.

His goal is to derive value from data in various areas such as production, companies, value chains, and society. By utilizing AI methods, he aims to improve efficiency, quality, and reduce risks and ecological impact. He believes that simple solutions are the best and that a good idea only becomes a real innovation when it is used effectively and scaled up. Since September 2022, he has been working as an independent IT consultant, offering advice to small, medium, and large companies on how to utilize AI and digitalization in various application areas. He works with Arborsys.de to help companies achieve their digital goals.

From 1997 to 2022, Karlheinz Blank worked at T-Systems as a portfolio and innovation manager, executive consultant, project manager, and IT architect in the automotive OEM industry. During this time, he focused on incorporating AI into projects.

From 1991 to 1996, he worked as a project manager at Daimler Research in Ulm and at the Research Institute for Application-Oriented Knowledge Processing (FAW) in Ulm. His main area of focus was User Modelling.

InMed Paper Presentations

INMED-01: Wednesday 14th June 2023

Time: 10:45 - 12:45 CEST

Room 4

INMED-01: Deep Learning in Medical Imaging I

Chairs: Dr. Iván Macía Oliver and Prof. Yen-Wei Chen

PROSE Paper No	Paper Title / Authors
imed23-025	Diffusion Models for realistic CT image generation Maialen Stephens Txurio, Karen López-Linares Román, Andrés Marcos-Carrión, Pilar Castellote-Huguet, José M. Santabábara-Gómez, Iván Macía Oliver, Miguel A. González Ballester
imed23-028	Unsupervised Data Drift Detection Using Convolutional Autoencoders: A Breast Cancer Imaging Scenario Javier Bóbeda, María Jesús García-González, Laura Valeria Pérez-Herrera, Karen López-Linares
imed23-029	Deep learning-based assessment of histological grading in breast cancer whole slide images María Jesús García-González, Karen López-Linares Román, Esther Albertin Marco, Iván Lalaguna, Javier García Navas, Maria Blanca Cimadevila Alvarez, Ana Calvo Pérez, Valery Naranjo Ornedo
imed23-030	Sample Viability Assessment from H&E Whole Slide Images for Lung Cancer Molecular Testing Laura Valeria Perez-Herrera, María Jesús García-González, Ruth Román Lladó, Cristina Aguado, Josep Castellvi, Sonia Rodriguez, Erika Aldeguer, María Teresa Torrijos, Karen Lopez-Linares
imed23-031	LOBAR EMPHYSEMA QUANTIFICATION ON CHEST X-RAYS USING A GENERATIVE AD- VERSARIAL REGRESSOR Mónica Iturrioz Campo, Javier Pascau, Raúl San José Estépar
imed23-032	Thorax-Net: A Full Thoracic Chest X-ray Segmentation Approach Maria Rollan-Martinez-Herrera, Jagoba Zuluaga-Ayesta, Francisco Martinez-Dubarbie, Marta Garrido-Barbero, Ane Zubizarreta-Zamalloa, Raúl San José Estépar

INMED-02: Wednesday 14th June 2023

Time: 15:15 - 17:15 CEST

Room 4

INMED-02: Deep Learning in Medical Imaging II

Chairs: Prof. Yen-Wei Chen and Dr. Iván Macía Oliver

PROSE	Paper Title / Authors
Paper No	
imed23-024	An Efficient Dual-Pooling Channel Attention Module for Weakly-Supervised Liver Lesion Classification on CT Images Duong Linh Phung, Yinhao Li, Rahul Kumar Jain, Lanfen Lin, Hongjie Hu, Yen-Wei Chen
imed23-027	An Improved Multi-Instance Learning Model for Postoperative Early Recurrence Prediction of Hepatocellular Carcinoma using Histopathological Images Gan Zhan, Fang Wang, Weibin Wang, Yinhao Li, Qingqing Chen, Hongjie Hu, Yen-Wei Chen
imed23-034	Teacher-student Learning Using Focal and Global Distillation for Accurate Cephalometric Landmark Detection Yu SONG, Xu QIAO, Yinhao Li, Yen-Wei Chen
imed23-006	Prior Active Shape Model for Detecting Pelvic Landmarks Chenyang Lu, Wei Chen, Xu Qiao, Qingyun Zeng
imed23-015	Deep Learning System for Automatic Diagnosis of Ocular Diseases in Infants Baochen Fu, Fabao Xu, Wei Chen, Chunyu Kao, Jianqiao Li, Xu Qiao
imed23-023	Predicting Stroke-Associated Pneumonia from Intracerebral Hemorrhage based on Deep Learning Methods Guangtong Yang, Min Xu, Lulu Gai, Wei Chen, Jin Ma, Xu Qiao, Hongfeng Shi, Yongmei Hu

INMED-03: Thursday 15th June 2023

Time: 15:00 - 17:00 CEST

Room 4

INMED-03: Medical Image Processing

Chairs: Dr. Mihaela Luca and Assoc. Prof. Tomio Goto

PROSE Paper No	Paper Title / Authors
imed23-021	Improved Diagnostic Accuracy of Rheumatoid Arthritic by Image Generation Using StyleGAN2 Tomio Goto, Reo Kojima, Koji Funahashi
imed23-039	BrainFuse: Self-Supervised Data Fusion Augmentation for Brain MRI's via Frame Interpolation Robert Herscovici, Cristian Simionescu
imed23-001	Designing deep learning architectures with neuroevolution. Study case: fetal morphology scan Smaranda Belciug, Rodica Nagy, Sebastian Doru Popa, Andrei Gabriel Nascu, Dominic Gabriel Iliescu
imed23-026	Deep Neural Network-based Classification of Focal Liver Lesions Using Phase-Shuffle Prediction Pre-training Jian Song, Haohua Dong, Youwen Chen, Lanfen Lin, Hongjie Hu, Yen-Wei Chen
imed23-037	PD-L1 prediction of lung cancer by a radiomics method using rough tumor mask in CT images Xiang Lv, Huadong Liu, Rui Xu, Dingpin Huang, Yuan Tu, Fangyi Xu, Yi Gan, Hongjie Hu *
imed23-020	Robust Watermarking Algorithm for Medical Volume Data Based on PJFM and 3D-DCT Lei Cao, Jingbing Li, Jing Liu, Yen-Wei Chen *

* Online session

INMED-04: Thursday 15th June 2023

Time: 10:30 - 12:30 CEST

Room 4

INMED-04: Projects, systems, and applications for smart medicine/healthcare

Chair: Prof. Yoshimasa Masuda

PROSE Paper No	Paper Title / Authors
imed23-022	Healthcare under Society 5.0: A Systematic Literature Review of Applications and Case Studies Jean Paul Sebastian Piest, Yoshimasa Masuda, Osamu Nakamura
imed23-040	Characterizing Groups of Patients with Depression using Clustering Techniques Ma. Sheila A. Magboo, Vincent Peter C. Magboo
imed23-018	Automatic Recognition of Check-Points for NCPV Video Review Noboru Nihshimoto, Mitsuhito Ando, Haruo Noma, Kogoro Iwanaga
imed23-013	Speech recognition in healthcare: a comparison of different speech recognition input interactions Eugenio Corbisiero, Gennaro Costagliola, Mattia De Rosa, Vittorio Fuccella, Alfonso Piscitelli, Parinaz Tabari

INMED-05: Friday 16th June 2023

Time: 10:00 - 12:00 CEST

Room 4

INMED-05: Data Driven Models for Health Care Systems

Chair: Dalia Kriksciuniene

PROSE Paper No	Paper Title / Authors
imed23-005	Modelling Competing Risk for Stroke Survival Data Virgilijus Sakalauskas, Dalia Kriksciuniene
imed23-007	Artificial Intelligence Chatbots and Conversational Agents - an overview of clinical studies in Health Care Stević I, Vukmirović D, Vujović V, Marinković V.
imed23-012	Challenges and Solutions for Artificial Intelligence Adoption in Healthcare – A Literature Review Uldis Donins, Daiga Behmane

INMED-06: Friday 16th June 2023

Time: 14:30 - 16:30 CEST

Room 4

INMED-06: Innovations in Assessment, Education, and Interventions for Children with Developmental Disorders

Chairs: Assoc. Prof. Margarita Stankova and Jingbing Li

PROSE Paper No	Paper Title / Authors
imed23-008	Online platforms and applications for the development and treatment of reading skills in children - a comparison between three countries Polina Mihova, Maria Mavrothanasi, Haneen Alshawesh, Tsveta Stoyanova *
imed23-009	Development of three language digital platform for early childhood development screening PTES – preliminary parents self-check results Nina Iordanova, Kornilia Tsoukka, Maria Mavrothanasi *
imed23-010	Online Parent Counselling in Speech and Language Therapy - the View of the Professionals Margarita Stankova, Tsveta Kamenski, Kornilia Tsoukka, Haneen Alshawesh, Alexandros Proedrou *
imed23-019	Robust Zero Watermarking Algorithm for Medical Images Based on BRISK-FREAK and DCT Fangchun Dong, Jingbing Li, Jing Liu, Yen-Wei Chen *
imed23-016	Robust Zero-Watermarking Algorithm for Medical Images Based on SUSAN-DCT Qinqing Zhang, Jingbing Li, Jing Liu, Uzair Aslam Bhatti, Yen-Wei Chen *
imed23-017	A robust watermarking algorithm for medical images based on DWT-Daisy and discrete cosine transform Yiyi Yuan, Jingbing Li, Jing Liu, Uzair Aslam Bhatti, Yen-Wei Chen *

KES International

Knowledge Brokerage | Professional networks | Conferences | Publications | Membership Services

KES INTERNATIONAL

For over a decade the mission of KES International has been to provide a professional community, networking and publication opportunities for all those who work in knowledge-intensive subjects. At KES we are passionate about the dissemination, transfer, sharing & brokerage of knowledge. The KES community consists of several thousand experts, scientists, academics, engineers, students and practitioners who participate in KES activities.

KES brings people together to make ... Knowledge Connections.

KES CONFERENCES

For over 20 years KES has run conferences in different countries of the world on leading edge topics -

Intelligent Systems -- *Intelligent Decision Technologies -- Intelligent Interactive Multimedia Systems and Services -- Agent and Multi Agent Systems -- Smart Technology based Education and Training*

Sustainable Technology -- *Sustainability in Energy and Buildings, Smart Energy -- Sustainable Design and Manufacturing.*

Innovation, Knowledge Transfer, Enterprise and Entrepreneurship -- *Innovation and Knowledge Transfer -- Innovation in Medicine and Healthcare*

Digital Media -- *Archiving Tomorrow -- Innovation in Music*

Some of the countries - Australia, Chile, Croatia, England, Germany, Japan, Ireland, Italy, Poland, Portugal, New Zealand, United States, Vietnam, Wales

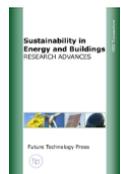

KES JOURNALS

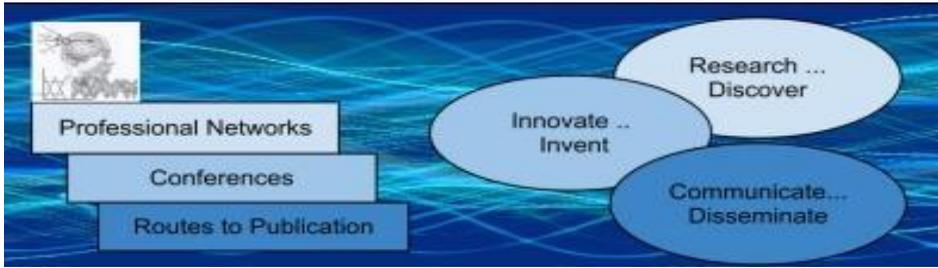

KES edits a range of journals and serials on knowledge intensive subjects -

-- *International Journal of Knowledge Based and Intelligent Engineering Systems -- Intelligent Decision Technologies: an International Journal -- InImpact: the Journal of Innovation Impact -- Sustainability in Energy and Buildings: Research Advances -- Advances in Smart Systems Research*

KES TRANSACTIONS -- THE KES OPEN ACCESS LIBRARY

KES Transactions is a book series containing the results of applied and theoretical research on a range of leading-edge topics. The series accepts conference proceedings, edited books and research monographs. Papers contained in KES Transactions may also appear in the KES Open Access Library (KOALA), our own online gold standard open access publishing platform.

TRAINING AND SHORT COURSES

KES can provide live and online training courses on all the topics in its portfolio. KES has good relationships with leading universities and academics around the world, and can harness these to provide excellent personal development and training courses.

DISSEMINATION OF RESEARCH RESULTS

It is essential for research groups to communicate the outcomes of their research to those that can make use of them. But academics do not want to run their own conferences. KES has specialist knowledge of how to run a conference to disseminate research results. Or a research project workshop can be run alongside a conference to increase dissemination to an even wider audience.

THE KES-IKT KNOWLEDGE ALLIANCE

KES works in partnership with the Institute of Knowledge Transfer (IKT), the sole accredited body dedicated to supporting and promoting the *knowledge professional*: those individuals involved in innovation, enterprise, and the transfer, sharing and exchange of knowledge. The IKT accredits the quality of innovation and knowledge transfer processes, practices activities, and training providers, and the professional status of its members.

ABOUT KES

Formed in 2001, KES is an independent worldwide association involving about 5000 professionals, engineers, academics, students and managers, operated on a not-for-profit basis, from a base in the UK. A number of universities around the world contribute to its organisation, operation and academic activities. KES International Operations Ltd is a company limited by guarantee that services the KES International organization.
